
My XR750 and my XR1000 project

Posted by outtacontrola - 2010/08/25 23:17

Hi there ,

Though i'd share some pics of my XR's with you guys .

First my XR750 (@1977)

I got this bike in sprint trim in the UK and found the Flattrack bits in some boxes - so put it back to that trim .

It's about how it would have been raced in the early 80's , with Marzocchi forks and a electronic ignition kit fitted .

pics here -

Next my new project , which is a C&J twinshock frame and Warrs old race XR1000 engine !

I'm gonna make a Lucifer replica out of her and have some nice running gear on a Sportster to fit when the motors up together .
